- Flexible

PROJECTS

- **STANDALONE CHATBOT DEVELOPMENT & DEPLOYMENT**

Developed a chatbot on my own using **Google Dialogflow** and integrated it with **Telegram** and also in web site.The chatbot offers basic standalone functionality for responding to user queries. **View project**
Skills gained:
  - NLP(Natural Language Processing)
  - Chatbot Development
  - Google Dialogflow(A cloud Platform)

- **CAR RENTAL SYSTEM**

This project, developed during my undergraduate program, focused on creating an online car rental platform. It was designed using core technologies like HTML, PHP, Bootstrap, and PHPMyAdmin. The project was successfully demonstrated and explained, earning an A grade for both its functionality and presentation.
Skills gained:
  - PHP
  - HTML
  - Bootstrap
  - CSS
  - PHPMyAdmin

- **FARMER INFORMANT SYSTEM**

This project, developed as part of my undergraduate program, aimed to support farmers by providing valuable information about crops, soil, seasons, and optimal locations. Additionally, the platform functioned as an e-commerce site, allowing farmers to buy and sell products. We built the project using core technologies such as PHP, HTML, JavaScript, and Bootstrap. During development, my team and I encountered a significant data collection challenge, which we overcame through collaboration, making this a truly memorable experience.
Skills gained:
  - PHP
  - HTML
  - JavaScript
  - Bootstrap
  - CSS

LANGUAGES

  - **MALAYALAM**
  - **ENGLISH**
  - **HINDI**
